THAT’S WHY WE FOCUS ON

Enriching the patient experience

By supporting the delivery of true value-based care through participation in the Enhancing Oncology Model program and enhanced services, such as care coordination.

Improving the lives of those who practice medicine

With decades of proven practice management expertise and the enablement of new revenue streams by accessing additional service lines such as clinical lab, pathology and oral oncolytic pharmacy.

Being 100% physician led and governed

Allowing for practice autonomy, where our partnership is collaborative and leveraged as a resource but, ultimately, what gets implemented in the practice is up to you.

“Practices can sometimes have concerns about losing autonomy and independence if they join a corporate program. With AON, we haven’t lost our autonomy and are free to practice what we consider to be the best medicine for our patients.”

Jeanna Knoble, MD
